

## Return to school for AMS:

1. Buildings/grounds will open at 8:00am. Students are not to arrive before 8:00am whether walking, riding their bike, or be dropped off by parent or guardian. Anyone coming into the building will be required to wear a mask. If they don't have one, we will provide it. If students refuse to wear the mask they will be asked to leave and parents will be called.
2. Students can be dropped off in two locations 1. The south gate in the alley and come in the cafeteria door off of the blacktop. 2. The front of the building by the south exit closest to the high school, enter the side door. Temps will be taken there by adults upon entrance to the building. If a student has a temp they will be brought to the office, a nurse called, parents called, and sent home. Anyone being dropped off to school after 8:15 am start time must report directly to the main entrance and buzz into the office.
3. The students will report directly to their locker to drop off bookbags and jackets then go directly to the classroom. We will station staff throughout the building to make sure students are going to the proper location. Restrooms will be off limits unless directed there by a staff member.
4. Students who have to see a nurse will be directed there and they will make a determination to send home or not. If the nurse is not here, they will be sent to the office and we will contact the nurse so they can make a determination to send the student home or not. If the student is sent home they will remain there for 10 days unless they get an alternative diagnosis the next day.
5. Any student or staff that test positive will be quarantined and we will do a thorough contact trace here at school and let anyone else know if they need to be quarantined as well.
6. Students will be able to have water bottles with them but will not be allowed to refill them at school.
7. Those that choose to stay home for distance learning must remain there for the quarter. At the quarter students will have the choice to continue to stay home or return to in-person learning.
8. For those who choose to stay home for distance learning the daily lessons, instruction, and homework will be posted in google classroom for students to access. There will be no live lessons recorded from in-person learning nor will the students have the ability to log in to live classroom lessons. Those students who chose to do distance learning will be able to contact teachers during their office hours daily. Teacher office hours will be posted on their google classroom page.
9. For those doing in-person learning, there will be no paper/pencil instruction to turn in. All work that will be turned in to be graded will be done via chromebook. Chromebooks and charger will travel to and from school daily. Students should charge Chromebooks every night. Students will be able to use scratch paper, workbooks, classroom notes ect. at their desks but will not hand it off to others.

10. Parent pick up will need to be done on North Grand (playground), and in the front parking lot of AMS. The alley will be used for buses only. There is no easy way to do this as we are limited in space. Please do not have your child come meet you on 7th street while in line to get into the parking lot. This is a major safety issue as they have to cross parking lot traffic to get there. Please be patient in this process.
11. Updated supply lists are available on the district web page.
12. Library will not be open but an online library is available that we will use for students. Students can also bring a book from home if they so choose.
13. Restrooms will be cleaned often throughout the day. Students will help in wiping down their work areas throughout the day. Custodians will thoroughly clean the building before the start of the next day. Students will wash hands and use hand sanitizer often.
14. Students will have recess and practice social distancing while outside. Any equipment used will be sanitized before the next use.
15. The administration has the discretion to make changes to the plan based on the changes in COVID 19.
